

Last Call, Course Marine Warranty Surveying (MWS) starts in October 2017

Press release: October 10th 2017

Our Marine Warranty Surveying (MWS) course is about all technical aspects required to successfully and safely execute a variety of offshore transport operations. The following course will be given from 17th to 19th October daily from 09:00 - 16:00 at our office in Almere, The Netherlands.

The intensive 3 day course is primarily aimed at project managers, future (marine) warranty surveyors as well as non-maritime engineers and professionals operational in the insurance sector. The course comprises of technical aspects required to successfully and safely execute a variety of offshore transport operations.

The main topics will include an introduction within the world of Marine Warranty Surveying followed by topics about naval engineering, hull strength and ship stability. The course will focus on DNV-GL regulations for mitigating risks prevalent in the complex maritime and offshore businesses. It will discuss the important maritime rules and regulations regarding safe offshore transport and the engineering. On successful completion of the course you will know more about the DNV regulations regarding safe ocean transport, report writing and the tasks and duties of a warranty surveyor.

Investing in professional marine warranty surveyors and thereby adhering to safe practices is the way forward as the risks involved are massive. The role and importance of marine warranty surveying is often misunderstood by the participating agencies in a marine/offshore engineering project, but with stringent regulation, the need for qualified personnel is increasing day by day.

The course is beneficial for anyone who wants to understand the fundamentals of Marine Warranty Surveying. Mr A.J. Bos, who has been involved in transport engineering projects for over 30 years is the director of HMC and will be the principal course facilitator. For more information or if you want to subscribe to our MWS course, please contact our office at info@hmc.nl.
