The right course for your career

HMC's open admission courses in 2015

Individuals have the opportunity to enhance their skills and knowledge through our open admission courses. We have set some dates in our course calendar which might be interesting for your company.

HMC offers the possibility to expand your knowledge by attending our open admission courses. We provide courses on several topics. This year HMC delivers its knowledge on several dates in Almere and Rotterdam on a Marine Warranty Surveying and Transport Engineering:

- 11-13 May ([Marine Warranty Surveyor](#))
- 19-21 May ([TESS](#), transport engineering)
- 6-8 October ([Marine Warranty Surveyor](#))
- 13-15 October ([TESS](#), transport engineering)

Anyone can subscribe via office@hmc.nl. Many organisations hire engineers of various fields and teach them the essentials of shipbuilding and offshore transportation. HMC offers student support from our experienced engineers, supported through our technical

staff, in both practical and academic activities throughout all levels of the course. All educational activities performed by HMC are based on in-house developed course materials which consist of a broad collection of presentations, assignments, booklets and working materials. More information about these courses or if you would like to know what kind of courses we could provide, please [contact](#) us or visit our [website](#).

2015, March
Release date: 03/03/2015

“Anyone can subscribe to our open admission courses”

HMC and M.I.C.E. Global signed an agreement for several courses for the Asian market for 2015

M.I.C.E. Global is a leading company for organizing business meetings, workshops, conferences and exhibitions in the Asian region. From 26th - 28th January 2015, HMC & M.I.C.E Global collaborated to facilitate a course on Marine Warranty Surveyor (MWS) in Singapore.

The planned MWS course, provides you or your team the possibility to review all operations, ensuring they are properly engineered and planned in line with agreed codes and industrial standards. As a Marine Warranty Surveyor you work on behalf of insurance underwriters, it's experts utilise their expertise and experience to evaluate risks and assess the feasibility of operations both by technical review and site attendance. We strongly believe that education needs to be an integrated part of doing business. Our business partner M.I.C.E. Global, is at the forefront of business market trends. Their team of market researchers strives to create events according to customer demands. HMC is looking forward to cooperate with M.I.C.E.

Global and share our visions about education. For more information and/or registration please contact us. More Information about our education program can be obtained by contacting us at info@hmc.nl or enquiry@miceglobal.com.sg.

HMC provides transport engineering courses for Royal Wagenborg

Royal Wagenborg chooses for HMC Maritime Education and the course Transport Engineering Towing & Shipping (TESS). This in-house developed course is about all technical aspects required to successfully and safely execute a variety of heavy lift transport operations.

Royal Wagenborg is an international logistic company operating a modern fleet of 230 vessels. Their first seminar will be given in early March of this year. The other two courses will be given at the end of March and in April. We are very proud to share our knowledge via the course [Transport Engineering \(TESS\)](#). HMC is recognized as one of the leading Dutch heavy transport engineering companies and operates worldwide. HMC's goal is to strengthen her innovative role by focusing on providing

solutions for today's challenges in the offshore industry. You can find more information at our [Maritime Education webpage](#). And if you are interested in one of our courses please contact us.

“HMC is looking forward sharing her knowledge with Royal Wagenborg”

Marine Warranty Survey course at Verweij Hoebee Groep, part of the BMT Group, in Rotterdam was very successful

Surveyors of the Verweij Hoebee Groep have the knowledge and experience to carry out - among others - valuations of inland barges, seagoing vessels and all kind of technical installations. HMC is delighted to share its knowledge and to have received the opportunity to be working with the Verweij Hoebee groep.

We understand the need for good marine warranty surveyors. In order to prevent loss or damage to marine installations we share knowledge to offshore installation companies, insurers, energy companies, oil and gas companies and freight forwarders with [Marine Warranty Surveyor \(MWS\)](#) courses. Marine Warranty Surveyors are the supervisors of maritime operations on behalf of a client and according to the insurer's interests. The [Verweij Hoebee](#) is a surveying company in the field of shipping and maritime industry

with offices in Amsterdam and Barendrecht for over 100 years. HMC's team already functioned as expert partner on specific areas of transport engineering, such as loading operations on board of semi-submersibles and ship stability calculations. We also gave courses on these topics at universities and private educational institutes nationally and internationally. HMC is delighted to share its knowledge and works with a highly practical insight. For more Information on our MWS course please contact us at info@hmc.nl
