CrewPlan 6

HMC's crew administration and planning program

CrewPlan 6 is HMC's solution for Crew Planning and Administration. CrewPlan 6 features a Gantt chart in which the planning per ship as well as crewmember specific data can be kept, such as on and off times, expiry dates of legal documents, certificates and planning and registry of medical checks. A unique ability in CrewPlan 6 is the automatic schedule check: CrewPlan 6 automatically lists all inconsistencies and warns for future planning problems so that users can act in advance and plan ahead, diminishing planning problems.
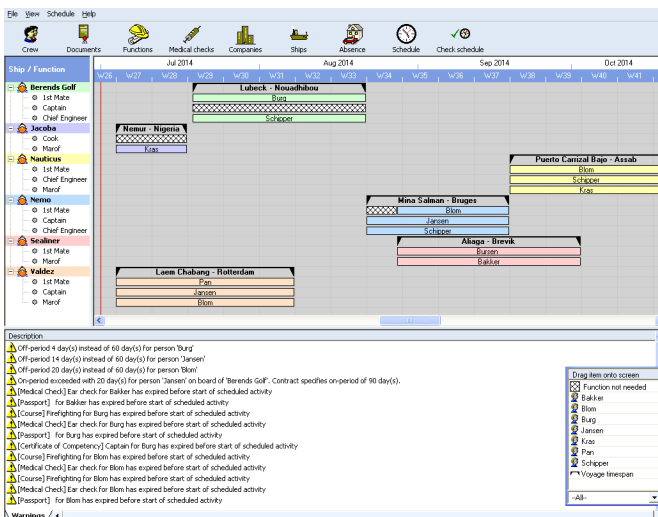

CrewPlan 6 application

The CrewPlan 6 application has been developed by HMC in co-operation with the present users. CrewPlan 6 is written for the Microsoft Windows operating system and can visualize schedules with a timespan of about 4 years.

Schedules can be printed for each function, ship or crewmember. CrewPlan 6 also acts like a crewmember database to store a broad range of personnel data.

Features and specifications

- Simple drag-and-drop crewmembers on functions for fast scheduling.
- Automatic on-placement schedule check to prevent double scheduled crewmembers.
- Schedule check to prevent gaps in schedule.
- Schedule check to ensure all functions are filled.
- Check on required certificates, Medical checks etc. for scheduled crewmembers.
- Check on expire-dates for Medical checks and Documents such as Passport, Seamansbooklet.
- User definable Medical checks and Documents including expire dates and period of validity.
- Clear overview of schedule by means of Gantt chart which provides a Person-Function and a Ship-Function view.

ISM CODE

CrewPlan 6 can optimise schedules taking into account the requirements pertaining to the certificates of crewmembers. As such assuring that the crew composition is in conformance with the national and international legislation and customer requirements. Thence CrewPlan 6 can be of assistance to act in compliance with ISM code.
